

ARJUN MAKESH

EDUCATION

B Tech in Computer Science and Engineering

SRM Institute of Science and Technology, Chennai | August 2024 — June 2028

- GPA (Previous Semester): 9.85
- CGPA: 9.76

EXPERIENCE

- **Hackathon - Hack to the Future - Kratos'25**

Resolved the problem statement of 'Malware Detection using Deep Learning' in a 12-hour hackathon.

- **Project - Sentiment Analyzer (Batch Processing Pipeline)**

- **Stack:** Python, Google Gemini API, HTML.
- Built a browser-based Batch Sentiment Analyzer and data pipeline designed to process CSV datasets of short-form social media posts.
- Executed per-item sentiment analysis using the **Google Gemini API** and visualized sentiment distribution in real time.

- **Project – AI Study Companion**

- Intelligent study productivity assistant combining computer vision and AI for real-time focus tracking and assistance.
- Used Media Pipe for gaze tracking, eye aspect ratio (EAR), and head pose estimation; YOLOv8 for detecting distractions.
- Integrated Google Gemini API for context-aware study help, document analysis (PDF, Word, PPT), and smart summaries.
- **Stack:** Python, OpenCV, MediaPipe, YOLOv8, Gemini API.

- **Project – Airplane Simulator (pygame)**

- A simple airplane simulator where the player has to dodge objects (birds) along the way using the pygame module.
- **Stack:** Python

- **Project – Movie Finder**

- Used to find the currently running movies in theatres and their details like ratings, cast, etc. It is built using React JS and the TMDB API.
- **Stack:** React JS, JavaScript and CSS

- **Project – A* Pathfinding Simulator**

- Interactive 2D navigation search algorithm demonstrator with step-through heuristic inspection using webot.

- **Project – WordPy**

- WordPy is a simulation where an AI bot attempts to guess a hidden 5-letter target word generated by a game engine using Python and the Python Imaging Library.

INTERESTS AND OBJECTIVES

Driven by a strong academic record (9.7 CGPA) and a passion for AI-powered real-time applications and practical software design. Interested in computer vision, human-AI interaction, and intelligent automation systems. Seeking Software Development or AI/ML internship opportunities to apply programming skills.

DETAILS

Chennai, India – 600117

arjun.makesh19@gmail.com

SKILLS

Programming Languages

Python, C, C++, HTML, JavaScript

Frameworks

Flask

API & Libraries

Python Imaging Library, OCR, Pandas, NumPy, Google Gemini API, Pygame, TMDB API

CERTIFICATES

Python3 Programming

IBM AI Developer

Microsoft AZ-900 Exam Prep

Hackerrank - Python Basics

Hackerrank – Software Engineer
